Strain, Force & Torque

- Strain gages, bondable resistors, installation, accessories & training
- StrainSmart Systems, Signal conditioners, portable strain indicators
- PhotoStress Photoelastic stress analysis systems

- Custom force, torque & strain measurement:
- Custom strain gage installation on components
 - Field & lab services for strain measurement & data acquisition
 - Custom transducer design & calibration

- Load Cells & Force sensors
- Torque sensors: reaction, rotating & wireless
- Multi-axis transducers
- Instruments: Digital displays & hand-held meters
- Calibration systems & services

- Hydraulic Testing Cylinders for Every Frequency and Range
- Compact hydraulic actuator construction
 - High stability and rigidity
 - High speeds and frequencies
 - Efficient for varying test series

State-of-the-art, non-intrusive Digital Image Correlation (DIC) optical tool for shape, strain and deformation analysis of solid, granular and liquid subjects.

- Pressure & level solutions for municipal, industrial, & process markets:
- Sensors for hostile service including slurries
 - Submersible pressure & level sensors

Self-Aware™ Programmable inches-of-water sensors, for Industrial, Medical and HVAC applications. A new generation of differential pressure sensors, based on NimbleSense™ ASIC technology, which provides an alert mechanism of potential performance issues, before system-alarm incidents occur. Higher accuracy and turn-down ratios, lower total-error-band, with the industry's lowest noise floor.

Thin-film tactile pressure & force measurement for gaskets, seals, grip/ergonomics, seating/bedding, brakes, tires, roller-nip & many other applications.

Pressure

Sound, Vibration & Environmental Test

- Dynamic/Piezoelectric sensors: acceleration, force & pressure
- Impulse hammers, sensor signal conditioners, & sensor cables
- Calibration Services for dynamic sensors from all manufacturers

G.R.A.S

Sound & Vibration

Specialists in high performance measurement microphones & related acoustic accessories for automotive, aviation & aerospace.

- Advanced vibration test equipment: Electro-dynamic shakers, slip tables, head expanders and multi-axis shakers.
- Environmental test chambers including: temperature, humidity, thermal shock, & altitude chambers.

Vibration test controls for electrodynamic & servo-hydraulic shakers:

- Test modes: Sine, Random, Shock, SoR, RoR, SRS, & more
- Features: Fatigue Damage Spectrum, Kurtosis, Field Data Replication, Transient Capture, & more

Data Acquisition

Gantner instruments

Ethernet/EtherCAT-based data acquisition and control solutions (24-bit, 100kHz A/D per channel) for test cells, test labs, portable/in-vehicle, & stand alone/data-logger applications.

High performance data acquisition including:

- Synergy multi-mode systems: recorder, scope, spectral, modal, & combustion analyzer
- Echelon in-vehicle DAQ: I/O, CAN, GPS, & video. IP-68

- StrainSmart® high performance data acquisition instrument utilizing strain gages and related sensors for stress analysis testing.
- High-speed, high-channel count signal conditioning & data acquisition solutions for aerospace, military, research testing applications.

OEM/Custom Sensors & Contract Manufacturing

Custom manufacturer of wire harnesses, interconnects, cable & wire assemblies including over-molding.

OEM manufacturer in sensor technology, HMI interfaces, & mechatronics, specializing in advanced-level sensors, encoders, rotary switches, customizable buttons, and solenoids for medical, appliance, industrial, and mobility applications.

Custom OEM force, pressure & torque

- Sensor design & manufacturing
- Amplifiers & integrated electronics
- OEM transducer manufacturing

Global Contract Manufacturers and Product Design Engineers:

- Designers and manufacturers of electrical and mechanical assemblies
- Supply chain, Quality, and Project Management

Flow

Flow meters: Turbine, Coriolis, magnetic, positive displacement, oval gear, & more.

- COX precision turbine flow meters for gases & liquids
- FLOW DYNAMICS NVLAP flow calibration services

Temperature

Thermocouples: general purpose, hand-held, RTD, and industrial probes. In addition to our standard products, we can also custom design and build probes to your specifications.

- Temperature transmitters: 4-20mA, HART, & wireless
- signal conditioners, digital indicators, & closed-loop controllers for temperature applications

Displacement

- High-accuracy position, thickness, & surface measurements

Non-contact capacitive displacement sensors, gap sensors, bore gauges, parallelism and density sensors with matching capacitance amplifiers, data acquisition systems, linearization & display software.

- LVDT displacement transducers for all applications
- Signal conditioning, amplifiers & digital displays

Eddy current non-contact position and displacement sensors

Wireless/Telemetry

The smallest, lightest, most power efficient, wireless measurement systems for torque, acceleration and other sensing application.

- Wireless telemetry
- Strain gage amplifiers & signal conditioners
- Indicators & digital display electronics

Servo-Control/ Special Test

- Motorized Material Testing for physical strength properties testing
- Motorized Product Testing Stands for static/monotonic force or torque testing

Sequential Logic Controller providing flexible, programmatic control of motors, solenoids, relays, heaters

Non-contact vibration measurement instrumentation & engineering services. Single point & scanning laser vibrometer systems.
